📁 PROJECTS

[expenses_tracker](#) 🔗

Expense Tracker — Developed a full-stack expense management application using Python, Flask, SQLite, and CustomTkinter. Implemented expense tracking, budget monitoring, analytics dashboard, category-wise reports, and PDF export functionality with an interactive and user-friendly interface.

[QUIZ COMPETITION](#) 🔗

Quiz Competition Web Application Developed an interactive Quiz Competition Web Application using **HTML, CSS, JavaScript, Python and Flask** to conduct online quizzes efficiently. Implemented features such as timer-based quizzes, automatic score calculation, multiple-choice questions, result generation, and responsive user interface design. Integrated backend database support for storing participant details, quiz questions, and scores. Designed the application with a user-friendly dashboard and deployment-ready configuration for smooth online access.

[hotel-management-system](#) 🔗

Hotel Management System — Developed a hotel management application to streamline room booking, customer management, billing, check-in/check-out, and payment processing. Improved operational efficiency with an organized database system and user-friendly interface using modern software development technologies.
